

The Next Generation of Crowdfunding

Pledgecamp is securing the future of crowdfunding with blockchain protected investments.

The Problem

Crowdfunding is a multi billion-dollar market with a trust problem.

Frequent Failure

Studies show up to 85% of projects delay and 14% fail to deliver.

No Trust

Less than 1/3 of users on Kickstarter have backed a second project.

No Accountability

Creators receive 100% of funds upfront, and owe nothing back if they fail.

Centralized

Many potential creators, especially in developing countries, remain excluded.

The Solution

Pledgecamp allows users to back with confidence, with blockchain-powered security and token incentives for collaboration.

Transparency

Reputable project creators place security deposits and perform KYC to earn your trust.

Acceleration

The Pledgecamp Ecosystem provides project creators the broad resources they need to succeed.

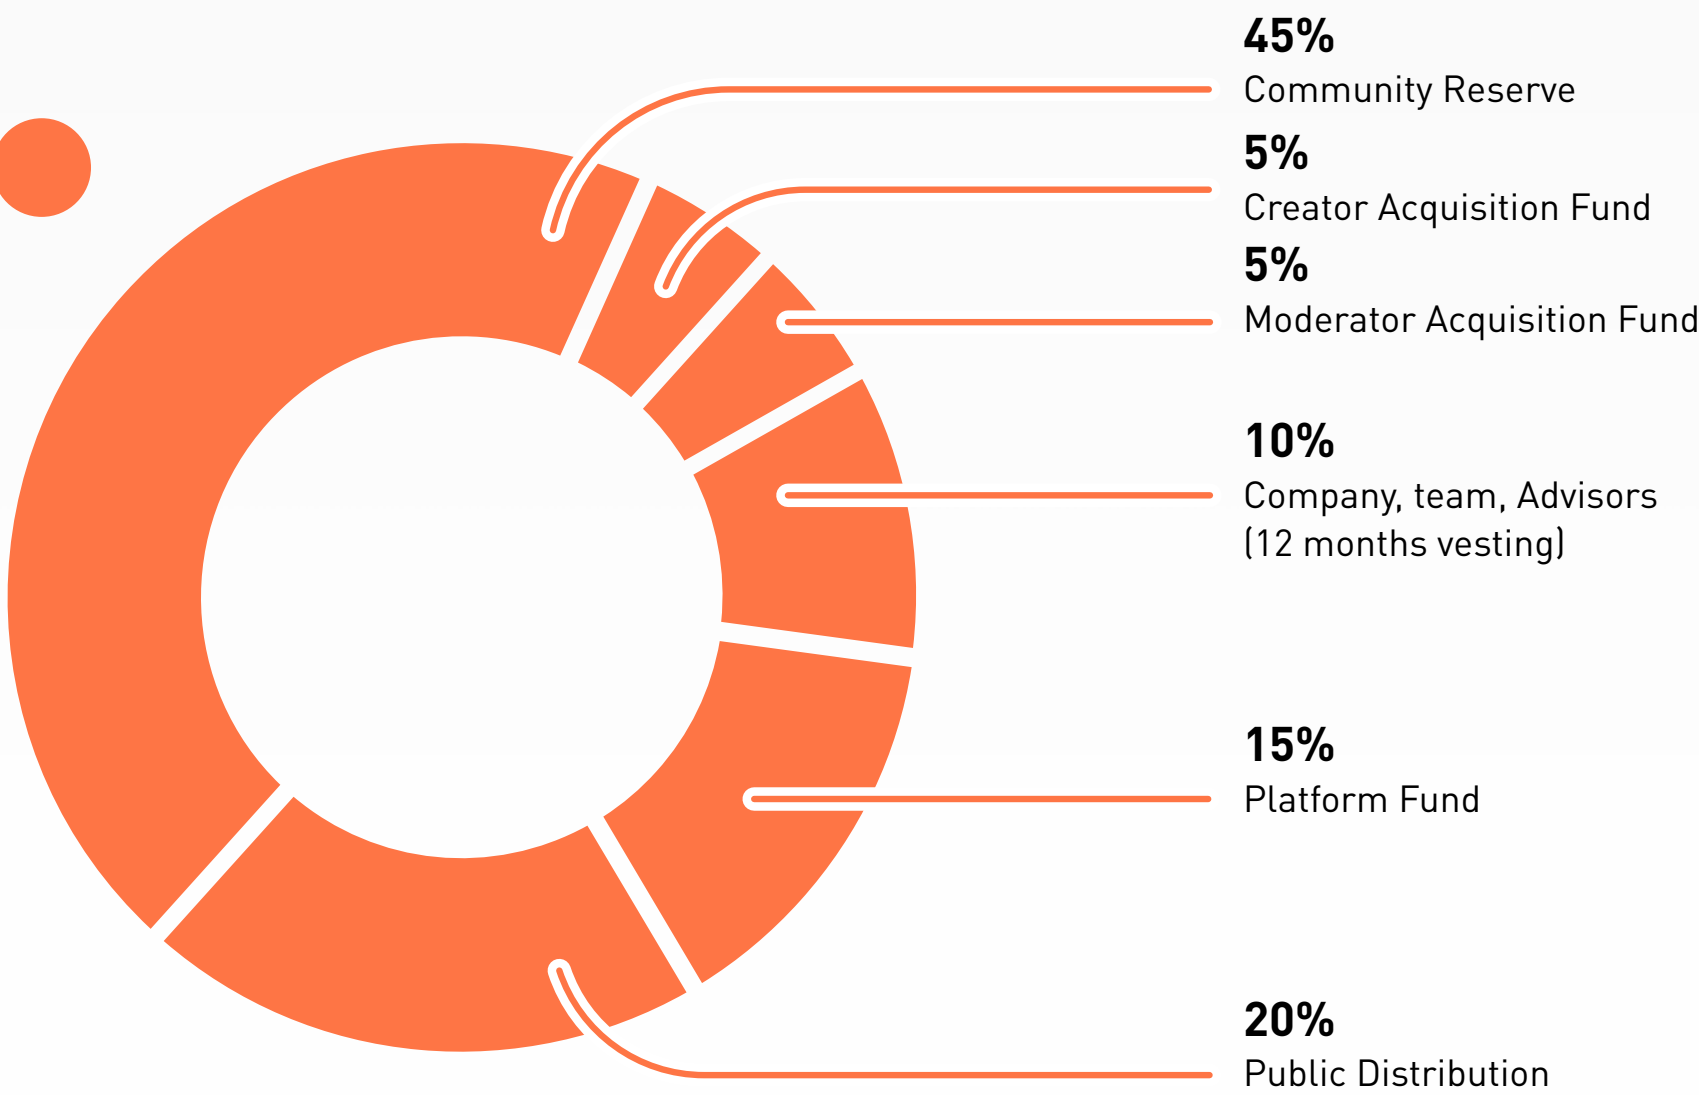

Accountability

Smart contracts secure funds in escrow, letting backers monitor and verify promised deadlines.

Collaborative

Help projects, earn rewards. Token incentives empower a Smart Crowd to contribute more than funds.

Token Allocation

PLG Tokens

Name	Pledge Coin (PLG)	Type	ERC20
Total Supply	1,000,000,000,000 PLG	Price per PLG	\$0.0001 USD
Remaining for Sale	30,000,000,000 PLG	Public Distribution	200,000,000,000 PLG

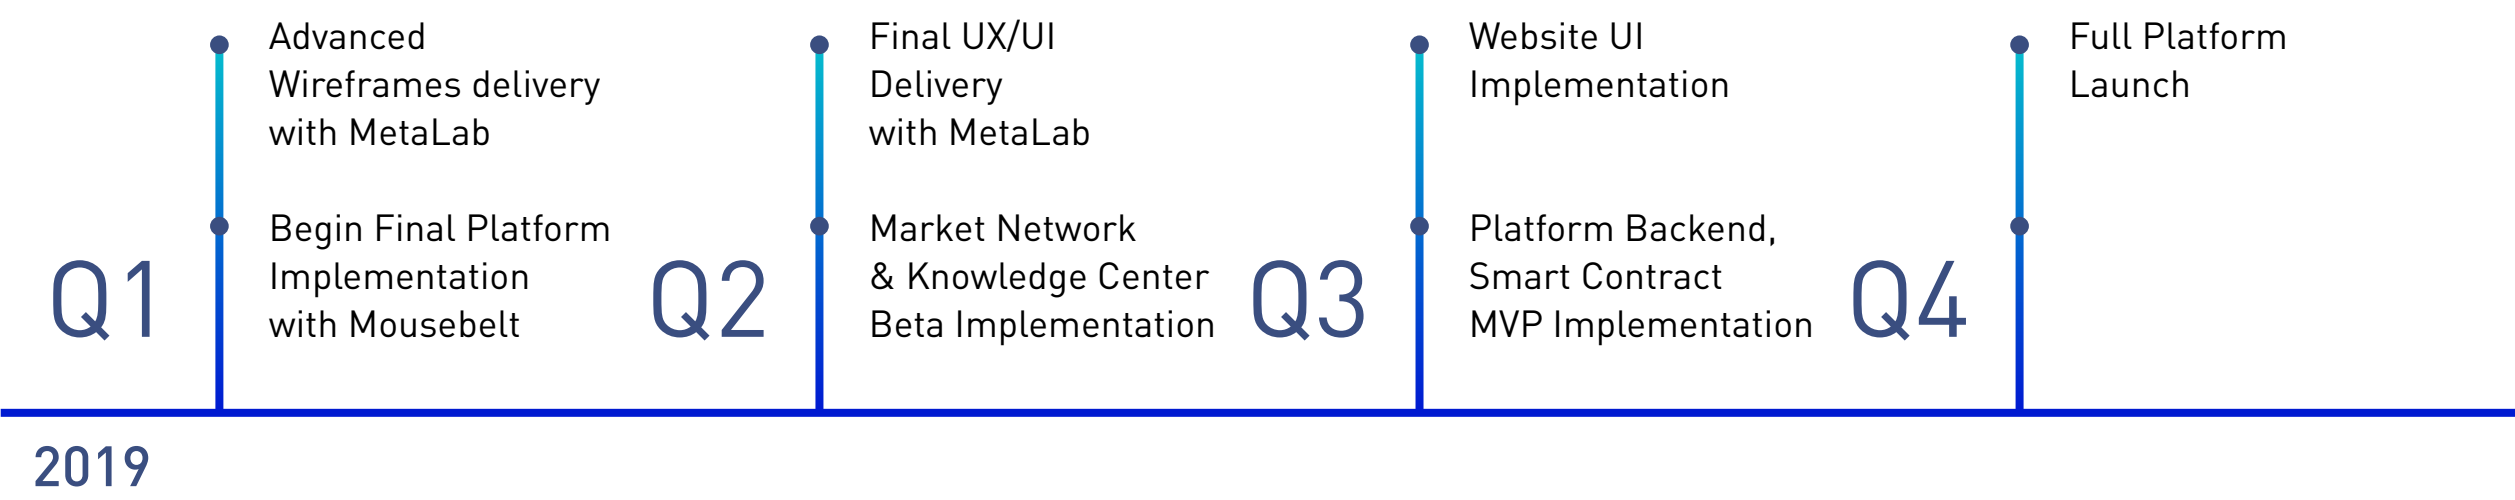

The tokens will not generally be available to "U.S. Persons" as defined by U.S. securities regulations and will be offered and sold outside the U.S. under the exemption provided by Regulation S under the Securities Act of 1933.

Pledgecamp Ecosystem

Pledgecamp is a decentralized ecosystem of next-generation crowdfunding, a Market Network for services, and a Knowledge Center for information.
